## **Upgrading of electrical supply to CBD and suburbs**

Bela Bela Local Municipality wishes to report that it has completed the upgrading of electrical network that supply electricity to the Central Business District and residential areas in town.

The upgrade is part of a R2m electrical project, which has been earmarked for the current 2010/2011 financial year.

The project, which included the replacement, installation and commissioning of two new HT cables in town, was completed on 16 February 2011.

The project completion thus ensures reliable electrical supply to the CBD and surrounding residential areas, which now has access to more electrical feeder cables.

This upgrade will further minimise the potential risk of power cuts in town whilst assisting in preventing the recurrence of an unfortunate power outages experienced recently due to a cable damage.

In this regard, the municipality wishes to extend its apologies to all ratepayers, residents, businesses, any party affected and inconvenienced by the power cuts on 08 – 09 February 2011.

The municipality therefore wishes to thank all residents, ratepayers and the Bela Bela Business Chamber for their patience and unwavering support during the recent power outages.

Your service and cooperation is highly appreciated

This working together, we can do more
