11. MBD 9: CERTIFICATE OF INDEPENDENT BID DETERMINATION

10.1. This Municipal Bidding Document (MBD) must form part of all bids[2] invited.

10.2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).[3] Collusive bidding is a *per se* prohibition meaning that it cannot be justified under any grounds.

10.3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:

a. take all reasonable steps to prevent such abuse;

b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and

c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

10.4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

10.5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

[2] *Includes price quotations, advertised competitive bids, limited bids and proposals.*

[3] *Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.*

SPECIFICATION

APPOINTMENT OF A SERVICE PROVIDER FOR THE INSPECTION, TESTING, DIAGNOSTIC ASSESSMENT AND ISSUING OF ELECTRICAL CERTIFICATES OF COMPLIANCE FOR BELA-BELA LOCAL MUNICIPALITY FACILITIES

1. BACKGROUND

Bela-Bela Local Municipality intends to appoint a suitably qualified and registered electrical service provider to undertake the inspection, testing and diagnostic assessment of electrical installations at identified municipal buildings and facilities.

The Municipality requires an assessment of the condition and compliance status of its electrical installations and, where installations comply with the applicable legislative and technical requirements, the issuing of valid Electrical Certificates of Compliance (CoCs) accompanied by the prescribed test reports.

Where an installation does not comply with the applicable requirements and a CoC cannot be issued, the appointed service provider shall provide the Municipality with a comprehensive Diagnostic and Non-Compliance Report detailing the defects and non-compliances identified and the corrective measures required.

The diagnostic reports will subsequently be utilised by the Municipality to develop separate specifications and/or Bills of Quantities for the rectification of identified electrical defects. Rectification works do not form part of this appointment.

2. PURPOSE OF THE APPOINTMENT

The purpose of the appointment is to:

- Inspect and test electrical installations at identified municipal facilities;
- Determine the condition and compliance status of each electrical installation;
- Assess compliance with applicable electrical safety legislation, regulations and standards;
- Identify unsafe conditions, defects and electrical non-compliances;
- Provide a comprehensive Diagnostic and Non-Compliance Report for each facility;
- Provide appropriate recommendations for the rectification of identified defects;
- Provide sufficient technical information to enable the Municipality to develop subsequent specifications and/or Bills of Quantities for rectification works;
- Issue valid Electrical Certificates of Compliance and prescribed test reports for installations that meet the applicable requirements; and
- Develop a consolidated electrical compliance status report/register for the identified municipal facilities.

3. APPLICABLE LEGISLATION AND STANDARDS

All inspections, testing, assessments and certification shall be undertaken in accordance with applicable South African legislation, regulations and standards, including but not limited to:

- Occupational Health and Safety Act, 1993 (Act No. 85 of 1993);
- Electrical Installation Regulations, 2009, as amended;
- Applicable provisions of the incorporated standards contemplated in the Electrical Installation Regulations;
- SANS 10142-1: The Wiring of Premises – Low-voltage installations, as applicable;
- Applicable requirements relating to electrical machinery and electrical installations under the Occupational Health and Safety legislative framework;
- Applicable municipal electricity supply by-laws and requirements; and
- Any other legislation, regulations, standards and codes applicable to the electrical installation being assessed.

Particular attention shall be given to the requirements of the Electrical Installation Regulations, 2009, including the requirements relating to responsibility for electrical installations, Certificates of Compliance, inspection and testing, and the issuing of Certificates of Compliance by appropriately registered persons.

5. SCOPE OF WORK

5.1 General

The appointed service provider shall undertake a comprehensive inspection, testing and diagnostic assessment of the electrical installation at each identified facility.

The assessment shall be sufficiently comprehensive to enable an appropriately registered person to determine whether the electrical installation complies with the applicable legislative and technical requirements and whether a valid CoC can be issued.

The service provider shall inspect the complete electrical installation falling within the applicable scope of certification at each facility.

5.2 Preliminary Assessment

Prior to detailed testing, the service provider shall:

- Identify the main supply and point(s) of control;
- Identify main and sub-distribution boards;
- Identify major electrical circuits and equipment forming part of the installation;
- Review available electrical drawings, previous CoCs and other relevant documentation where made available by the Municipality;
- Identify any obvious electrical safety hazards requiring immediate attention; and
- Determine the extent of inspection and testing required.

The absence of existing drawings, previous certificates or other records shall not relieve the service provider of its responsibility to undertake the required assessment.

6. ELECTRICAL INSPECTION

The inspection shall include, where applicable, assessment of the following:

- Incoming electrical supply;
- Point of control;
- Main distribution boards;
- Sub-distribution boards;
- Circuit breakers and other protective devices;
- Earth leakage protection;
- Earthing systems;

7. ELECTRICAL TESTING

The service provider shall undertake all tests required to establish the safety and compliance status of the installation and to complete the prescribed test report.

Testing shall include, where applicable:

- Continuity of protective conductors;
- Continuity of bonding conductors;
- Insulation resistance;
- Polarity;
- Earth continuity;
- Earth resistance, where applicable;
- Operation of earth leakage/protective devices;

- Verification of circuit protection;
- Verification of isolation;
- Verification of electrical connections;
- Functional testing;
- Verification of protective measures;
- Testing required for completion of the prescribed electrical test report; and
- Any additional tests required by the applicable standards.

All test equipment used shall be suitable for its intended purpose and appropriately calibrated.

Proof of valid calibration for relevant test instruments shall be provided upon request by the Municipality.

8. DIAGNOSTIC AND NON-COMPLIANCE REPORT

A Diagnostic and Non-Compliance Report shall be prepared for each facility, irrespective of whether the installation is ultimately found to be compliant.

The report shall provide the Municipality with a clear technical assessment of the installation and shall, as a minimum, contain:

8.1 Facility Information

- Facility name;
- Physical location;
- Date of inspection;
- Name and registration details of the registered person conducting/supervising the assessment;
- Description of the installation assessed; and
- Extent/boundaries of the electrical installation covered by the assessment.

8.2 Inspection and Testing

The report shall provide:

- Description of inspections undertaken;
- Tests conducted;
- Test results;

- Distribution boards and major components inspected;
- Overall condition of the installation; and
- Any limitations encountered during the assessment.

8.3 Identified Defects and Non-Compliances

For every defect or non-compliance identified, the report shall state:

- Unique defect/item number;
- Description of the defect/non-compliance;
- Exact or identifiable location;
- Distribution board/circuit/component concerned, where applicable;
- Applicable regulatory or technical requirement;
- Nature of the safety or compliance risk;
- Recommended corrective action;
- Materials/components likely to be required;
- Estimated quantities, where reasonably determinable;
- Whether further specialist investigation is required;
- Whether the defect prevents the issuing of a CoC; and
- Photographic evidence, where applicable.

9. RISK CLASSIFICATION OF DEFECTS

Identified defects should be classified to assist the Municipality in prioritising subsequent rectification works.

The following classification shall be used:

Critical: An immediate or serious electrical safety risk requiring urgent attention.

High: A significant safety or regulatory non-compliance that should be addressed as a priority.

Medium: A non-compliance requiring corrective action but not presenting the same immediate risk as Critical or High items.

Low: Minor defects, labelling deficiencies or other lower-risk compliance matters requiring correction.

Where the service provider identifies an electrical condition presenting an immediate danger to persons or property, the Municipality's authorised representative shall be notified immediately and the matter shall not be deferred until submission of the final report.

10. RECOMMENDED RECTIFICATION MEASURES

The diagnostic report shall provide sufficient technical information for the Municipality to understand what corrective work will subsequently be required.

Recommendations shall therefore, as far as reasonably possible, specify:

- Nature of corrective work;
- Location;
- Relevant circuit/distribution board;
- Type of component requiring replacement or repair;
- Appropriate technical specification;
- Approximate quantity;
- Applicable standard; and
- Any specialist work required.

The recommendations must be sufficiently detailed to assist the Municipality in preparing a subsequent specification and/or Bill of Quantities.

The service provider shall not undertake any rectification works under this appointment.

Identification of corrective measures shall not constitute authorisation to undertake repairs, alterations, replacements or improvements.

11. CERTIFICATE OF COMPLIANCE

Where, following inspection and testing, the registered person determines that an electrical installation complies with the applicable requirements, the service provider shall issue a valid Electrical Certificate of Compliance (CoC) together with the prescribed electrical test report.

A separate CoC shall be issued for each applicable electrical installation/facility.

Where the installation does not comply with the applicable requirements, no CoC shall be issued merely for purposes of satisfying the contract deliverable.

Instead, the Diagnostic and Non-Compliance Report shall clearly state:

NON-COMPLIANT – RECTIFICATION REQUIRED PRIOR TO THE ISSUING OF AN ELECTRICAL CERTIFICATE OF COMPLIANCE.

The report shall identify the defects preventing certification.

Where compliant, the report shall state:

COMPLIANT – ELECTRICAL CERTIFICATE OF COMPLIANCE ISSUED.

12. INSTALLATIONS OUTSIDE THE SCOPE OF CERTIFICATION

Given the nature of certain municipal operational facilities, particularly the Water Treatment Works, Wastewater Treatment Works and Pump Stations, the service provider shall clearly identify any electrical machinery, specialised plant, medium-voltage equipment or other electrical installations/equipment that do not fall within the scope of the CoC being issued.

The service provider shall not represent that a CoC for a particular installation covers electrical equipment or plant that legally or technically falls outside its scope.

Any such equipment shall be separately identified in the diagnostic report, together with recommendations regarding any further specialist assessment required.

13. CONSOLIDATED ELECTRICAL COMPLIANCE REPORT

Following completion of all assessments, the service provider shall prepare a Consolidated Electrical Compliance Report covering all facilities.

The report shall include, as a minimum:

Facility	Inspection Completed	Compliance Status	Critical Defects	High-Risk Defects	CoC Issued	Further Action Required

The consolidated report shall also provide:

- Overall municipal electrical compliance status;
- Number of facilities assessed;
- Number of compliant facilities;
- Number of CoCs issued;
- Number of non-compliant facilities;
- Summary of Critical, High, Medium and Low defects;

- Facilities requiring further specialist assessment; and
- Recommended prioritisation of subsequent rectification works.

14. DELIVERABLES

The following deliverables shall be provided:

For each facility:

1. Inspection and testing of the electrical installation;
2. Electrical test results/report;
3. Diagnostic and Non-Compliance Report;
4. Photographic record of significant defects/non-compliances;
5. Recommended corrective measures;
6. Electrical CoC and prescribed test report, where the installation is compliant; and
7. Identification of specialised equipment/installations requiring separate assessment, where applicable.

Overall:

8. Consolidated Electrical Compliance Report for all 13 municipal facilities; and
9. Consolidated electronic register of identified defects and recommendations.

All final documentation shall be submitted electronically in PDF format, with editable schedules/registers additionally provided in an appropriate editable format.

15. SERVICE PROVIDER REQUIREMENTS

The bidder shall be suitably qualified and legally authorised to perform the required work.

The bidder shall provide:
